

# AWARD WINNING INNOVATION FOR THE BAR

As the Bar continues to evolve and adapt to significant market change, would you benefit from a more modern approach to the delivery of your specialist services and increased definition to your practice?

**GRL LEGAL**  
human resources

Our client is one of the UK's most innovative Barrister led entities and provides advice, advocacy, litigation, policy, and strategy services in fraud and financial crime cases. Its domestic and international work is undertaken through direct access instruction and Solicitor referrals and clients range from international firms and high net worth individuals to SMEs and sole practitioners.

Having successfully established its market presence, the next phase of its strategic growth is the addition of several business minded and forward-thinking Barristers or a Team. Practising in a similar or complementary area, you will be an established civil and/or criminal practitioner with a clear commitment to the innovative delivery of specialist legal services.

This new business model is regulated by the Bar Standards Board and provides much greater flexibility to

clients and practitioners, whilst retaining positive elements of a more traditional model and supporting a public interest research Centre.

**Clients** benefit from a more modern approach, the ability to communicate and interact quickly and directly with their legal team and costs transparency - including fixed fee arrangements, where appropriate.

**The business** benefits from its own agility, in-house case support, ability to adapt to changing requirements, defined specialist areas, a proven track record of innovation in providing legal services, low financial contributions for members and opportunities to participate in the development and success of the business.

Through its extensive work with the Bar, GRL fully understands the requirements for complete confidence, which underlines everything we do.
